As a Front-end engineer, I am skilled in creating visually appealing and intuitive user interface using variety of web development technologies. With my experience in HTML, CSS, JavaScript, React.js, and Bootstrap, I am able to develop and maintain scalable, responsive, and cross-browser compatible web application.

I have an understanding of user-centered design principles and I am able to translate complex business requirements into simple and effective front-end solutions. I am also proficient in using version control tools such as Git and GitHub, and have experience working in agile development environments.

In addition, I am constantly keeping up-to-date with the latest web development trends and best practices. I am passionate about developing innovative and user-friendly web applications, and I am dedicated to delivering high-quality work that meets or exceeds client expectations.
